

A Sound Sea Platform

Offshore[®] [Russia]

The magazine that brings you the entire wealth of global offshore oil and gas production experience, now in Russian

The world's biggest gas platform, Troll Offshore Gas Platform, is in the North Sea, and went in the Guinness Book of Records in 1996

1988
Shtokman field discovered

1897
World's first offshore oil produced, from three 411-meter piers in California, sea depth up to 10.7 m

1933
First drilling derrick mounted on a barge in the USA

1947
First commercial well drilled in the Gulf of Mexico from a floating platform close to shore

1954
First edition of **Offshore** Magazine published in USA

1961
First trial subsea oil production system installed in Gulf of Mexico

1900
Offshore drilling on small rocky islands

1925
Drilling offshore Baku on wooden foundations

1934
Metal platforms used in Caspian Sea for the first time

1944
Commercial assembly of platforms for sea depth up to 15 meters begins in Baku

2013
First Russian-language edition of **Offshore** Magazine

* of world offshore oil and gas production

Who is it for?

- EXECUTIVES
- engineers
- geologists
- geophysicists
- DESIGNERS
- researchers

- Companies
- GLOBAL
- regional
- production
- exploration
- juniors
- services
- ENGINEERING
- specialized
- multi-discipline
- equipment manufacturers

The appearance of a magazine like this, which brings together the entire world experience of offshore oil and gas development in the Russian language, is no accident.

Offshore exploration and development in Russia itself has been the focus of attention recently from all parties - the state, as the owner of subsurface resources and which wants them to be explored and developed, and the companies that possess the investment and technologies to do this.

There are many problems of a technological, economic and legal nature related to the Russian shelf, and I am confident there will be something to discuss in the pages of the magazine and a wealth of interesting articles very soon.

Yury Ampilov,

Professor, Doctor of Physics and Mathematical Sciences,
Academician of the Russian Academy of Natural Sciences

What's it about?

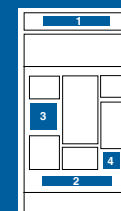

- OFFSHORE
