NEWS from the world of gas technologies, infrastructure and utilisation

Medium

The gas for energy newsletter is published bi-monthly in English. It provides information on topics in gas technology, infrastructure, utilisation and the corresponding technology. The newsletter complements the gas for energy technical journal as a quarterly publication. Both media are published by Deutscher Industrieverlag publishers, Munich, Germany. The newsletter and gas for energy technical journal provide readers around the world with specialised technical knowledge, information on the latest market trends and on new developments in the gas technology industry.

Editorial concept

Bi-monthly, the gas for energy newsletter supplies its specialist readers with information on the inter-

national gas technology industry. The focus is on technical developments, market trends, corporate news and reports on products and events. With its motto of "Moving the business with first-class information", the gas for energy newsletter assures the knowledge lead necessary for decision-makers.

Target group

The gas for energy newsletter is aimed at decision-makers in the international gas industry. Like the gas for energy technical journal, the newsletter addresses top and technical management within companies, along with the owners and managerial staff of small and medium-sized enterprises as well as associations.

Advertising modes and rates

Advertising mode	Data format	Format	Rates in €

CATEGORIES MARKET PLACE G4E-PORTAL 2017:
GAS RECOVERY

- Production technology on-shore / off-shore
- Hydraulic fracturing
- Tight gas / shale gas
- Valves for downhole equipment
- Drill hole expansion

GASES & GAS QUALITIES

- **Natural gas**
 - Low-grade / high-grade gas
 - LNG
- **Biogas**
 - Biogas plants and installations
 - Biogas preparation and feed-in
- **Other gases**
 - LPG
 - SNG
 - Hydrogen
- **Gas preparation**
 - Odorants and odourisation equipment
 - Gas purification
 - Gas drying
 - Filtration

GRID, TRANSPORT, STORAGE

- Grid design
- Grid planning
- Grid operation
- Smart grid
- Gas transport
- Gas distribution
- Compressors
- Plant construction
- Power-to-Gas
- Gas storages
- Cavern storage
- Pore storage
- Bulk storage
- Energy storage

PIPELINES, VALVES AND CORROSION PROTECTION

- **Pipelines and pipeline accessories**
 - Pipeline engineering and installation
 - Piping-system rehabilitation and maintenance
 - Piping-system monitoring and pressure testing
 - Seals and gaskets
 - Shapes
 - Gas detectors
 - Welding equipment
 - Pigs
 - Pipe penetrations
- **Valves and accessories**
 - Shut-off and tapping valves
 - Valves
 - Control valves
 - Building-services connections
 - Valve servicing
 - Bladder equipment
 - Temporary shut-off elements
- **Corrosion protection**
 - Active corrosion protection
 - Passive corrosion protection

MEASURING

- Gas-pressure control and flow-control equipment
- Gas-measuring equipment
- Measuring technology
- Pressure-measuring equipment
- Equipment and systems for gas-pressure control and measurement
- System planning and construction
- Smart metering
- Leak detection systems and equipment
- Calibration equipment
- Safety equipment and warning systems
- Compact control stations for underground installations

UTILISATION

- **Gas appliances**
 - Gas power plants
 - Gas turbine
 - CHP plants and cogeneration
 - Heat pumps
 - Fuel cells
 - Gas boiler
 - Gas radiator
 - Industrial burners
- **Mobile appliances**
 - Natural gas vehicles (cars/trucks/busses)
 - Natural gas filling stations
 - Valves for natural gas filling stations
 - LNG filling stations
 - LNG ships

TRADING AND INFORMATION TECHNOLOGY

- Gas trading
- Data acquisition
- Data registration
- Data transmission
- Data safety
- Software for data transmission, data evaluation and data invoicing
- Telecontrol
- Remoter meter reading

STANDARDS AND SET OF RULES (E.G. DVGW CERT)

- Pipe and pipeline engineering
- Corrosion protection
- Gas piping system inspection companies
- Gas appliance servicing companies
- Filters
- Gas-measuring equipment and instruments
- Mini cogeneration-plant units
- System servicing

MISCELLANEOUS

- Engineering services
- General Services
- Other advisory and consulting services
