

Instrumentation, Monitoring, and Control Systems

Coming with the July Issue

Closing date: June 15, 2007

Whether its gas detection, riser monitoring, or production measurement, equipment used in instrumentation, monitoring and control of oilfield systems and processes is vital to the offshore oil industry. The trend toward deeper waters, harsh environments, and higher pressures and temperatures is constantly increasing the need to measure, monitor and control. More than ever before, the offshore industry recognizes the value of new technology and expertise to support their instrumentation needs.

If you are a marketer of instrumentation, monitoring equipment/services, or control systems, this is an ideal place for your sales message. Offshore is the leading monthly magazine to the world's offshore industry. With over 42,000¹ subscribers in every level of management, engineering, and technical operations. Offshore is consistently ranked the best read² and most important magazine by industry decision-makers.

And, Offshore's lead generation system will help you generate qualified leads for your sales force!

Deliver your sales message to more than 42,000¹ potential customers!
